oasis-copper.xyz

Introduction

The \$Copper Coin isn't just another cryptocurrency, but the centerpiece of our grand vision. We call it the Oasis - a vast, decentralized digital universe where freedom of exchange and limitless potential for creation are just the beginning. This isn't just a coin, it's the key to a new world of unlimited possibilities. Let's begin the journey to the oasis.

Infrastructure

Oasis is based on the Ethereum blockchain and uses non-fungible tokens (NFTs) to represent unique digital assets created by users.

The \$Copper Coin, an ERC-20 token, is used for all transactions within the Oasis .

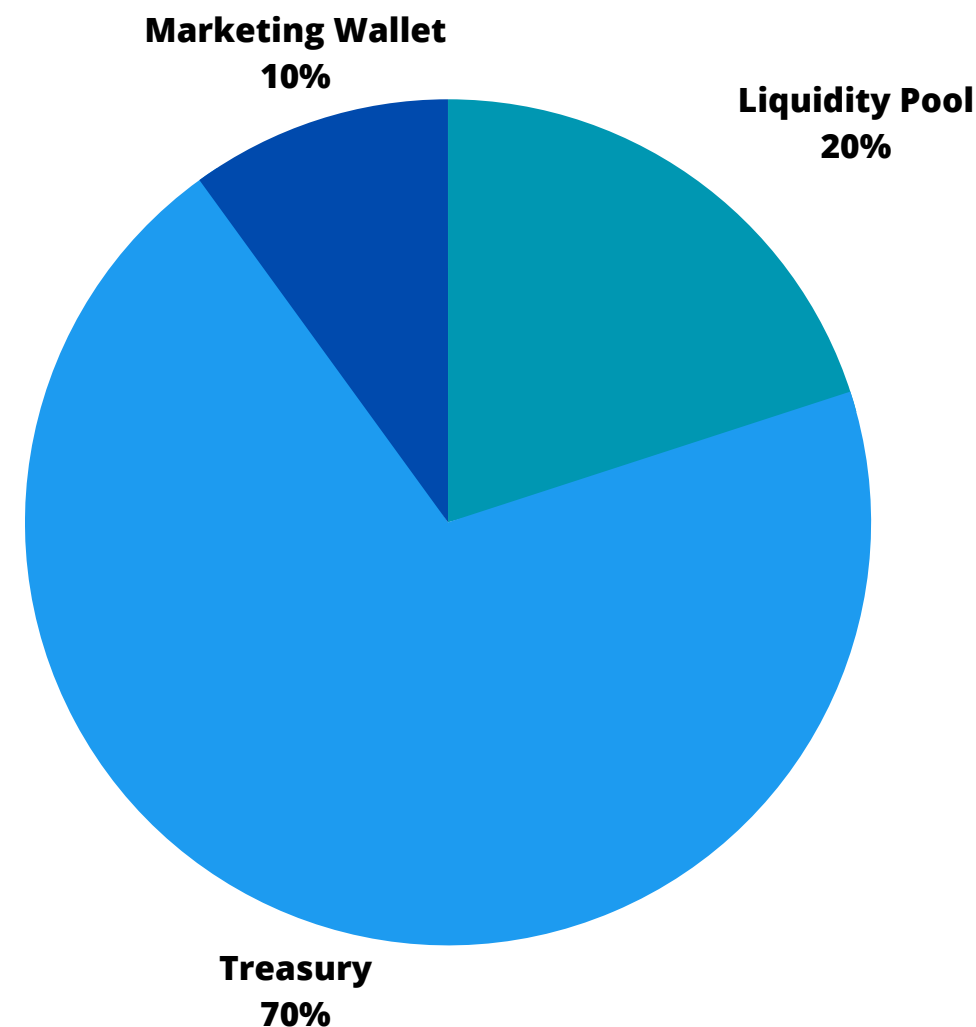

Tokenomics

We are creating a decentralized application interface (dApp) with a dedicated Ethereum wallet to collect ETH contributions for a token pre-sale. Participants will be asked to send their ETH contributions to the specified wallet address.

Tokens will be available at a special pre-sale discount of \$0.10 per token. The minimum investment amount is set at \$500,000.

In our unique presale structure, the starting price of the token is dynamically determined by the total amount invested during the presale. This means that **the more invested during the presale, the higher the starting price** of the token will be.

This gives participants the opportunity to influence the starting price of the token and thus increase the value of their investment. (if the total amount is doubled, the value of the token will also double)

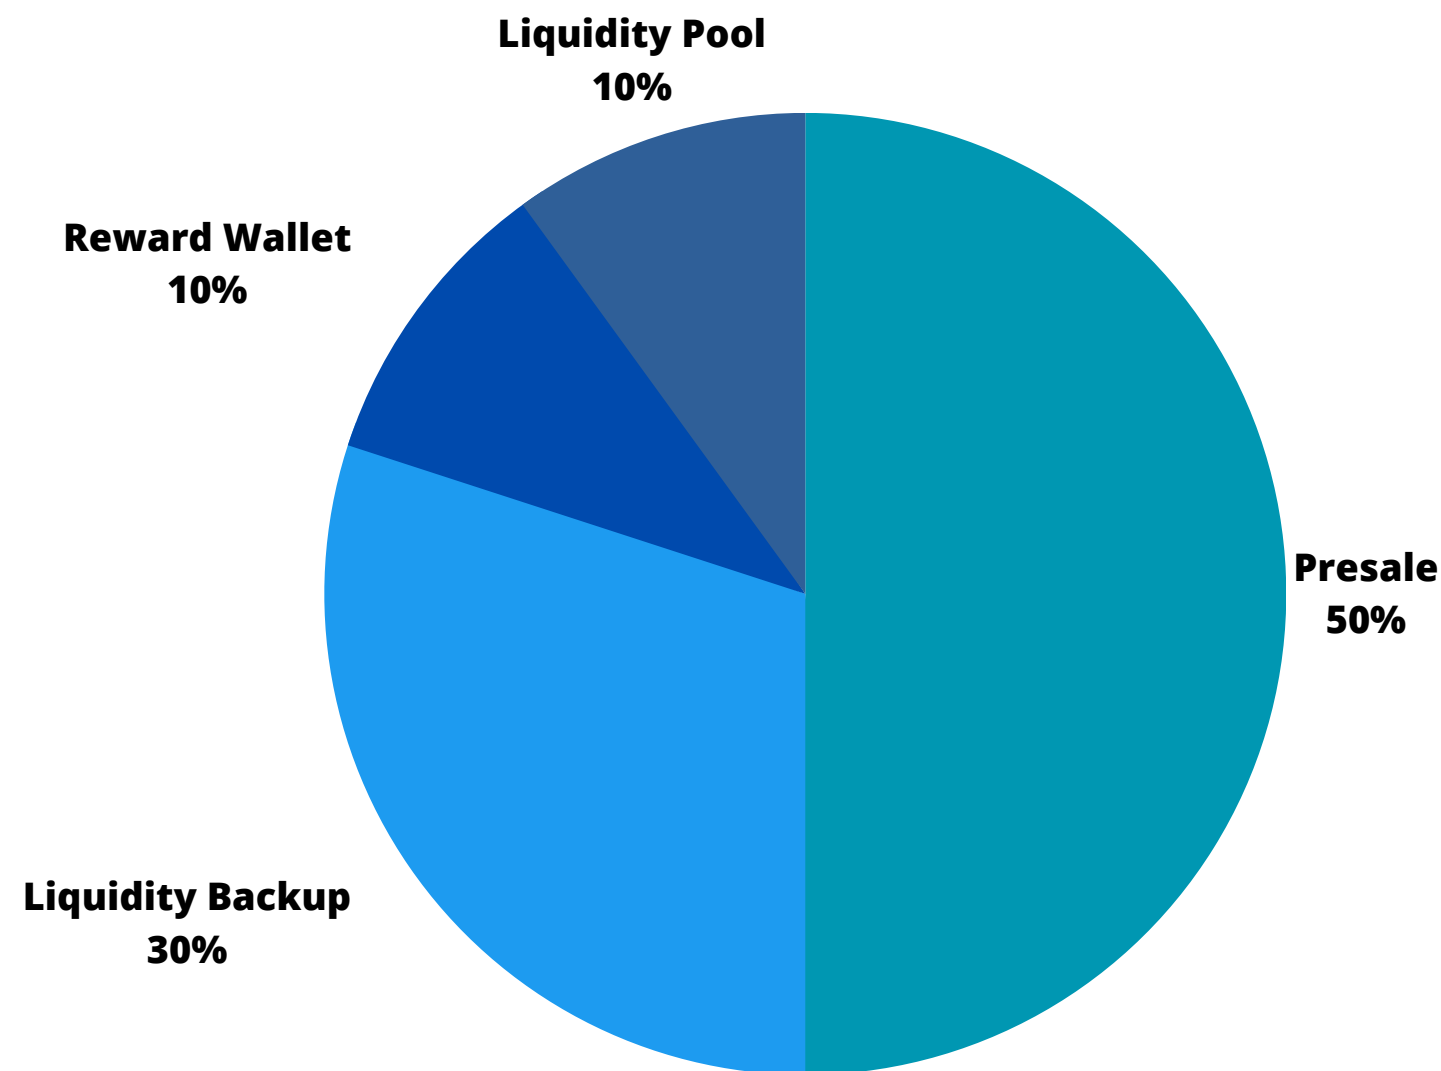

Presale liquidity

1. Liquidity Pool: 20% of the 100 ETH will form the \$Copper Coin liquidity pool on Uniswap.
2. Treasury Wallet: 70% will be kept for continued development of Oasis.
3. Marketing Wallet: 10% will be used to fund marketing and community growth initiatives.

Tokenomics

The total offering of \$Copper Coin is 10 million tokens, distributed as follows:

Presale liquidity

1. Pre-sale (50%): Most of the funds are reserved for the pre-sale phase.
2. Liquidity Reserve (30%): A significant portion is set aside as a reserve for liquidity needs.
3. Reward Wallet (10%): Set aside for incentives and rewarding for active community members.
4. Liquidity Pool (10%): Funds set aside to build and maintain the \$Copper Coin liquidity pool on Uniswap.
5. Team Wallet (0%): **No allocation for the team wallet**

Tokenomics

Imagine entering the Oasis, a vibrant digital world where the possibilities are endless. At the heart of this universe lies the \$Copper Coin, the token that powers all interactions within the Oasis.

But the **\$Copper** Coin is more than just a currency. It is the backbone of a sophisticated system designed to encourage engagement and reward participation. Every transaction you make with the \$Copper Coin, whether it's a purchase or a sale, is subject to a small **4% tax**. Half of this tax is used to **burn** \$Copper Coins, reducing the overall supply and potentially increasing the value of the remaining tokens. The other half goes into the "**Reward Wallet**" a special reserve used to reward those who have invested in Oasis.

But that's not all. The Oasis also offers a unique staking system (The Vault). Similar to a bank, you have the option to lock your \$Copper Coins for a certain period of time. After staking your coins for at least 48 hours, you can receive weekly rewards from the Reward Wallet. This is a way to say thank you for your commitment to the Oasis ecosystem.

Together, these mechanisms create an environment that encourages active participation and **long-term investment**. Whether you are a creator, a trader, or simply an explorer, Oasis and the \$Copper Coin provide a space where you can not only trade and create but also be rewarded for your contributions to this ever-evolving digital world.

Governance

We advocate a democratic approach to the management of the Oasis. holders of \$Copper Coins have a say in important decisions about the development and management of the Oasis.

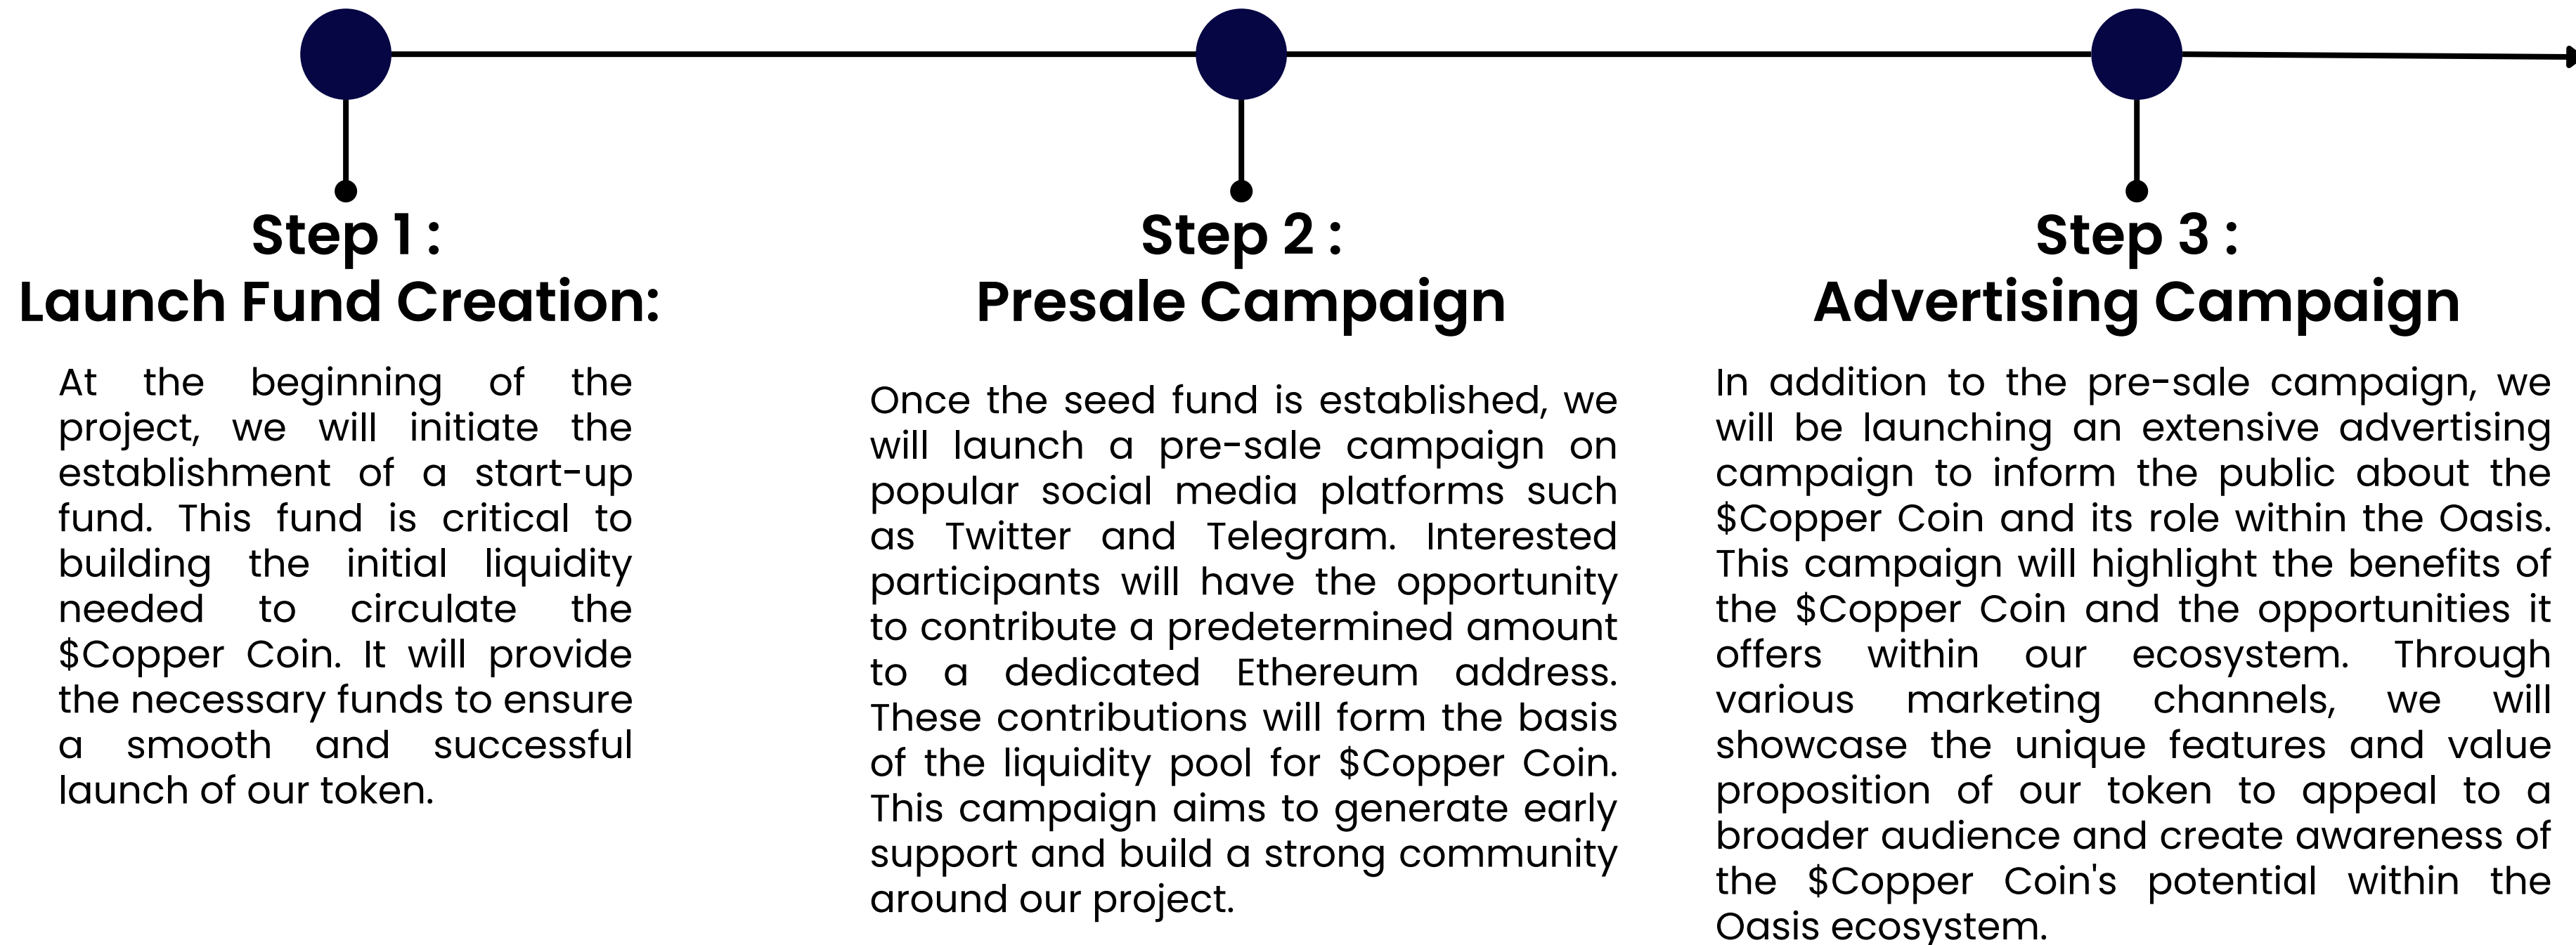

Roadmap

Our plan unfolds in several key phases, starting with the launch of \$Copper Coin, followed by the development of Oasis, the launch of NFTs, and the ongoing optimization of our platform.

Phase 1

The first phase includes the establishment of a seed fund, the organization of a pre-sale campaign, the official launch of the \$Copper Coin and its listing on a decentralized exchange. This phase aims to build a solid foundation for the \$Copper Coin and the Oasis. By involving our community from the beginning, we aim to create a positive momentum that will accompany us on our development journey.

Phase 1

A horizontal timeline arrow with three dark blue circular markers. Each marker is connected to a vertical line that leads to a step description below the arrow.

Step 4 :
Official Launch of the \$Copper

After the successful collection of pre-sale funds, the \$Copper Coin will be officially launched. The funds collected will be used to replenish the liquidity pool to ensure a smooth and balanced distribution of the \$Copper Coin. A portion of the funds will also be allocated to the marketing wallet, which will support our ongoing efforts to promote and develop \$Copper Coin and Oasis. This strategic allocation of funds is intended to provide a solid foundation for the growth and sustainability of our project.

Step 5 :
\$Copper Coin Airdrop

All donors will receive an airdrop of \$Copper Coins equal to the value of their initial donation. These tokens will be deposited directly into their Ethereum wallets, allowing them to join the Oasis ecosystem from day one. This airdrop serves as a gesture to reward and encourage early supporters so they can immediately experience the benefits and opportunities that \$Copper Coin offers within Oasis.

Step 6 :
Exchange (DEX) Listing

Eventually, the \$Copper Coin will be launched on a decentralized exchange (DEX). This milestone will enable widespread distribution and immediate availability of the \$Copper Coin to all those who wish to participate in the Oasis. By listing on DEX, we are ensuring that the \$Copper Coin can be easily traded and accessed by a wide range of people, promoting liquidity and inclusivity within the Oasis ecosystem. This move opens up the opportunity for users to engage with the \$Copper Coin and leverage its utility within the decentralized marketplace.

Roadmap

Phase 2 :

Development and Enhancement of the Oasis

In this phase, we are focusing on creating an intuitive user interface, developing content creation tools, integrating game mechanics, and introducing chat and networking features. Our goal is to make Oasis an engaging experience and make it a hub for creativity, entertainment, and social interaction. By continuously improving and expanding the platform's features, we seek to meet the evolving needs and desires of our community and foster a thriving digital ecosystem where users can let their imaginations run wild and interact with like-minded people.

Phase 3 :

Introduction of NFTs

In this phase, we will integrate Non-Fungible Tokens (NFTs) into Oasis, enabling users to create, own, and trade unique digital assets. NFTs offer a revolutionary way to represent and authenticate digital property and open up new opportunities for artists, creators, and collectors in our digital universe. With the integration of NFTs, users will be able to showcase their creativity, collect rare and exclusive digital items, and participate in a vibrant marketplace for digital art, virtual real estate, in-game assets, and more. The introduction of NFTs will further enrich the Oasis experience by offering a variety of unique digital items and fostering a thriving economy within our decentralized ecosystem.

Roadmap

Phase 4 :

Continuous Optimization

Our commitment to improvement remains steadfast as we make improving Oasis performance a top priority. We will continually introduce new features to enhance the user experience and expand capabilities in our digital space. At the heart of our optimization efforts is active collaboration with the community, whose feedback and suggestions we listen to closely. By leveraging community insights, we can ensure that Oasis remains a dynamic and responsive platform that is constantly evolving to meet the changing needs and desires of our users. Our relentless pursuit of optimization aims to create an ever-improving environment that fosters boundless creativity, seamless interactions, and an unparalleled sense of immersion in Oasis.

OASIS Project \$COPPER

Conclusion

The \$Copper Coin and the Oasis embody a new way of understanding and engaging with the digital world. They create a space where each individual has the power to create, act, and enjoy the fruits of their labor. Join us on our journey to realize the Oasis and become part of a movement for a freer and more open digital future. Together, let us create a world where imagination knows no bounds, where innovation thrives, and where every individual has the opportunity to freely express themselves. Embrace the potential of the \$Copper Coin and the Oasis and let us embark on this transformative journey to a better digital future.
